

Qingdao Packing I/E Co., Ltd.

Our products cover such diverse sectors as fertilisers, fodder, the automobile industry, upholstery, food and chemical products, etc.

We have the machinery required to personalise your products. Our team is entirely at your service to analyse your requirements and recommend the best solution for each case.

OUR MAIN PRODUCTS:

LAMINATED POLYPROPYLENE (RAFFIA) SACKS

DESCRIPTION

Tubular sacks, open at one end, with a sewn base and an exterior laminated layer. These sacks are usually white, but we can manufacture coloured bags if large quantities are ordered.

USE

Suitable for bagging fertilisers, chemicals and building material.

NON-LAMINATED POLYPROPYLENE (RAFFIA) SACKS

DESCRIPTION

Tubular sacks, open at one end, hemmed with a sewn base. The sacks are white, but we can manufacture them in the colour required by our clients if large quantities are ordered.

USE

Suitable for bagging cereals, rice, almonds, flour, pulses, fodder, potatoes, spices, etc.

POLYPROPYLENE (RAFFIA) FABRIC SACKING

DESCRIPTION

The polypropylene raffia sacking can be supplied laminated or non-laminated.

USE

Fabrics suitable for all types of special packaging, the automobile industry, upholstery and decoration

BIG BAGS

DESCRIPTION

Containers of great capacity, whose fabric prevents leakages and does not require any special handling.

USE

Suitable for packaging and transporting farming and industrial products.

POLYMESH 25 KG SACK WITH FASTENER AROUND OPEN END

DESCRIPTION

Available in red, white and ochre.

USE

Suitable for bagging potatoes, garlic, onions, chestnuts, lemons, etc.
